## PROFESSIONAL SUMMARY

AI data quality and evaluation specialist with 10 months of hands-on work evaluating and annotating **image, video, audio and text** data for multimodal AI models at Innodata, built on **9+ years of quality management and team leadership** at IntouchCX. Six Sigma Black Belt. I turn rubrics into consistent judgments, catch the edge cases models get wrong, and write rationales that hold up to review. I also produce AI-generated images and video every week, so I know where generative models fail.

## CORE SKILLS

|                                      |                                                                                                                                                                |
|--------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Generated media evaluation</b>    | Image and video quality comparison; review of AI edits (inpainting, object removal, region and multi-turn edits); artifact and continuity detection            |
| <b>Preference ranking (RLHF)</b>     | Side-by-side and Elo-style ranking of text, image, speech and video outputs, with written rationales                                                           |
| <b>Audio &amp; speech</b>            | Speech transcript review and correction; speaker counting, intervals and timestamps; text-to-speech evaluation; emotion, tone and sound labeling               |
| <b>Vision &amp; video annotation</b> | Bounding boxes, segmentation masks, referring expressions, grounding verification (incl. UI elements); temporal ordering, action segmentation, event alignment |
| <b>Quality &amp; operations</b>      | Quality audits, guideline adherence, edge-case documentation, root-cause analysis, coaching, KPI reporting, Six Sigma                                          |
| <b>Tools</b>                         | Excel, Google Sheets, Power BI; Python (Pandas) and SQL basics; GPT Image, Kling, CapCut                                                                       |

## PROFESSIONAL EXPERIENCE

**Innodata Inc.** | Analyst – AI / LLM Dec 2025 – Sep 2026  
Remote · Fixed-term contract, concluded September 2026

- Evaluated and annotated image, video, audio and text data across hundreds of task types for multimodal AI model training and evaluation.
- Compared and ranked model outputs side by side (text, image, speech, video) for preference and Elo-style evaluations, with written rationales.
- Reviewed AI-generated and AI-edited images and video for prompt match, artifacts and continuity errors.
- Reviewed and corrected speech transcripts; labeled speakers, timestamps, emotion and sound; rated text-to-speech quality.
- Drew and verified bounding boxes, masks and grounding; labeled video events, actions and temporal order; reviewed other annotators' work.

**IntouchCX** | Assistant Team Lead Jun 2016 – Sep 2025  
Bengaluru · Senior Customer Support → Specialist (Mentor) → Assistant Team Lead

- Ran quality audits and coached associates on process compliance and KPI adherence for global gaming and entertainment clients; mentored and trained 25+ associates.
- Handled critical escalations with root-cause analysis; maintained 95%+ CSAT and strong QA scores.
- As Assistant Team Lead, managed multiple client projects, supervised mentors and QAs, tracked daily metrics and led weekly client business reviews.
- Owned workforce planning, rosters and leave scheduling to meet SLAs; built reporting and automation in Power BI and Excel macros.

**Tapzo (formerly HelpChat)** | Brand Executive Aug 2015 – May 2016

- Handled inbound chat support across multiple services, resolving user queries and online transaction issues.

## PROJECTS

**Python data tools** (GitHub): CSV-Cleaner-Pro and PDF-Parser-Pro, Python + Pandas + Streamlit apps for cleaning and extracting data. **ML learning projects**: customer segmentation and loan-approval classification (scikit-learn).
